DID YOU KNOW?

Sun Valley General Improvement District has partnered with HydroCorp Inc. to provide data collection, management, and notification services for all annual backflow testing.

For customers with backflow prevention devices, this means you will now receive notifications, on District letterhead, when your device(s) are due for inspection. Each notice will include instructions on how to submit test results to HydroCorp, along with payment directions for the service, which is due at the time each test is submitted. Test results may be submitted either by the customer or by the certified tester.

HydroCorp will handle all questions related to testing notices, and their contact information will be included in the notifications from the District. The District will also post information about this service on the website.
