### **SHUT OFF VALVE**

The District encourages you to know where your main water shut off to your home is located so you can respond to broken pipes without waiting for our service person to arrive. In mobile homes, the valve is typically placed near to where water enters the home. In houses, it may be near a hot water heater or washing machine.

### **WATER / SEWER SERVICE CALLS**

- During normal business hours, a Service Technician is available at no charge to respond to routine water or sewer service calls.

- Sewer Calls: We recommend that you contact us prior to calling a plumber for sewer-related issues so that we can check property line clean outs and the main lines to determine whether the problem is within District facilities, which would be fixed at no cost to the customer, or whether the issue is on the property and a recommendation to call a plumber would be given.

#### **AFTER-HOURS EMERGENCY SERVICE**

- For water and sewer emergencies please call (775) 673-2220 where you will be connected to our after-hours answering service, then possibly prompted through to our On-Call Service Technician.
